EXHIBIT 1

DIRECT TESTIMONY (SUMMARY) OF JOHN PORTER

[DOCKET NO. L-00000B-15-0059-00170, CASE 170]

In The Matter Of The Application Of Salt River Project Agricultural Improvement And Power District, In Conformance With The Requirements Of Arizona Revised Statutes, Sections 40-360, Et Seq., For A Certificate Of Environmental Compatibility Authorizing The Price Road Corridor Project, Non-Gila River Indian Community Portion Located In The City Of Chandler, Arizona Or Within Maricopa County.

Sun Lakes HOAs intend to call Mr. John Porter as its sole witness. Mr. Porter is a member of the organization's Executive Committee, and will provide the Line Siting Committee with testimony concerning how the group was formed, and under what authority it represents the views of the residents of the Sun Lakes communities. Mr. Porter will testify that the organization is comprised of representatives from three homeowners association (IronOaks, Sun Lakes Country Club and Cottonwood/Palo Verde), and was formed in response to Salt River Project's ("SRP") proposal to construct a 230kV transmission line in the East Valley. The organization's primary concern is about potential detrimental impacts the proposed transmission line will have on Sun Lakes residents.

Mr. Porter will focus his testimony on the impact of SRP's proposed route segment from Old Price Road to substation RS28 (N6 to N7), located on Intel Corporation's private property, as depicted on SRP Map Figure E-1 ("Intel Segment"). As currently proposed, the Intel Segment will include a 100-foot corridor with a southern boundary 400 feet from the IronOaks community. Because of the impact to Sun Lakes HOAs residents, the transmission line should be placed underground. However, in the event the Line Siting Committee determines that placing this segment underground will not serve the public interest, then Sun Lakes HOAs propose that the Intel Segment should be set back at least 750 feet from the northern boundary of IronOaks. This is consistent with previous representations made by Intel Corporation about its goals to minimize the impact of its industrial operations and related facilities on Sun Lakes. Mr. Porter will present visual evidence concerning the material difference on the visual impact the proposed line will have at 750 feet, as opposed to 450 feet (assuming the line is built at the 100 foot corridor centerline).

Finally, Mr. Porter will testify as to Sun Lakes HOAs support for SRP's preferred route segment from Hunt Highway to the Schrader substation (N1-N3), as depicted on SRP Map Figure E-1 ("Preferred Eastern Segment"). Because the Preferred Eastern Segment will be located within a corridor that already includes other electric lines and railroad tracks, it will have the least overall detrimental impact on the surrounding community. By contrast, the Arizona Ave. route alternative will have a direct impact on Sun Lakes HOAs residents living on Arizona Avenue.
